

PREQUALIFICATION OF TUBEWELL CONTRACTORS SAHIWAL 2X660MW COAL FIRED POWER PLANT

ECSP is providing consultancy services for developing groundwater resources to fulfill cooling make up water for Sahiwal 2X660MW Coal Fired Power Plant. Aquifer test is to be carried out for estimating aquifer parameters by installing test tubewell and piezometers:

Tubewell contractors duly registered with Pakistan Engineering Council and interested to participate in the tendering process may apply for pre-qualification by submitting application and necessary documents for pre-qualification on or before May 2, 2014 1500 hrs.

Gist of scope of work involved is as follows:

- A test tubewell;
- Piezometers (water level observation wells);
- Conducting aquifer test by pumping tubewell; and
- Measuring response of water table to pumping.

Application with false information will be rejected.

ECSP reserves the right in its sole discretion to accept or reject any or all applications without assigning any reason.
